

# Routes:

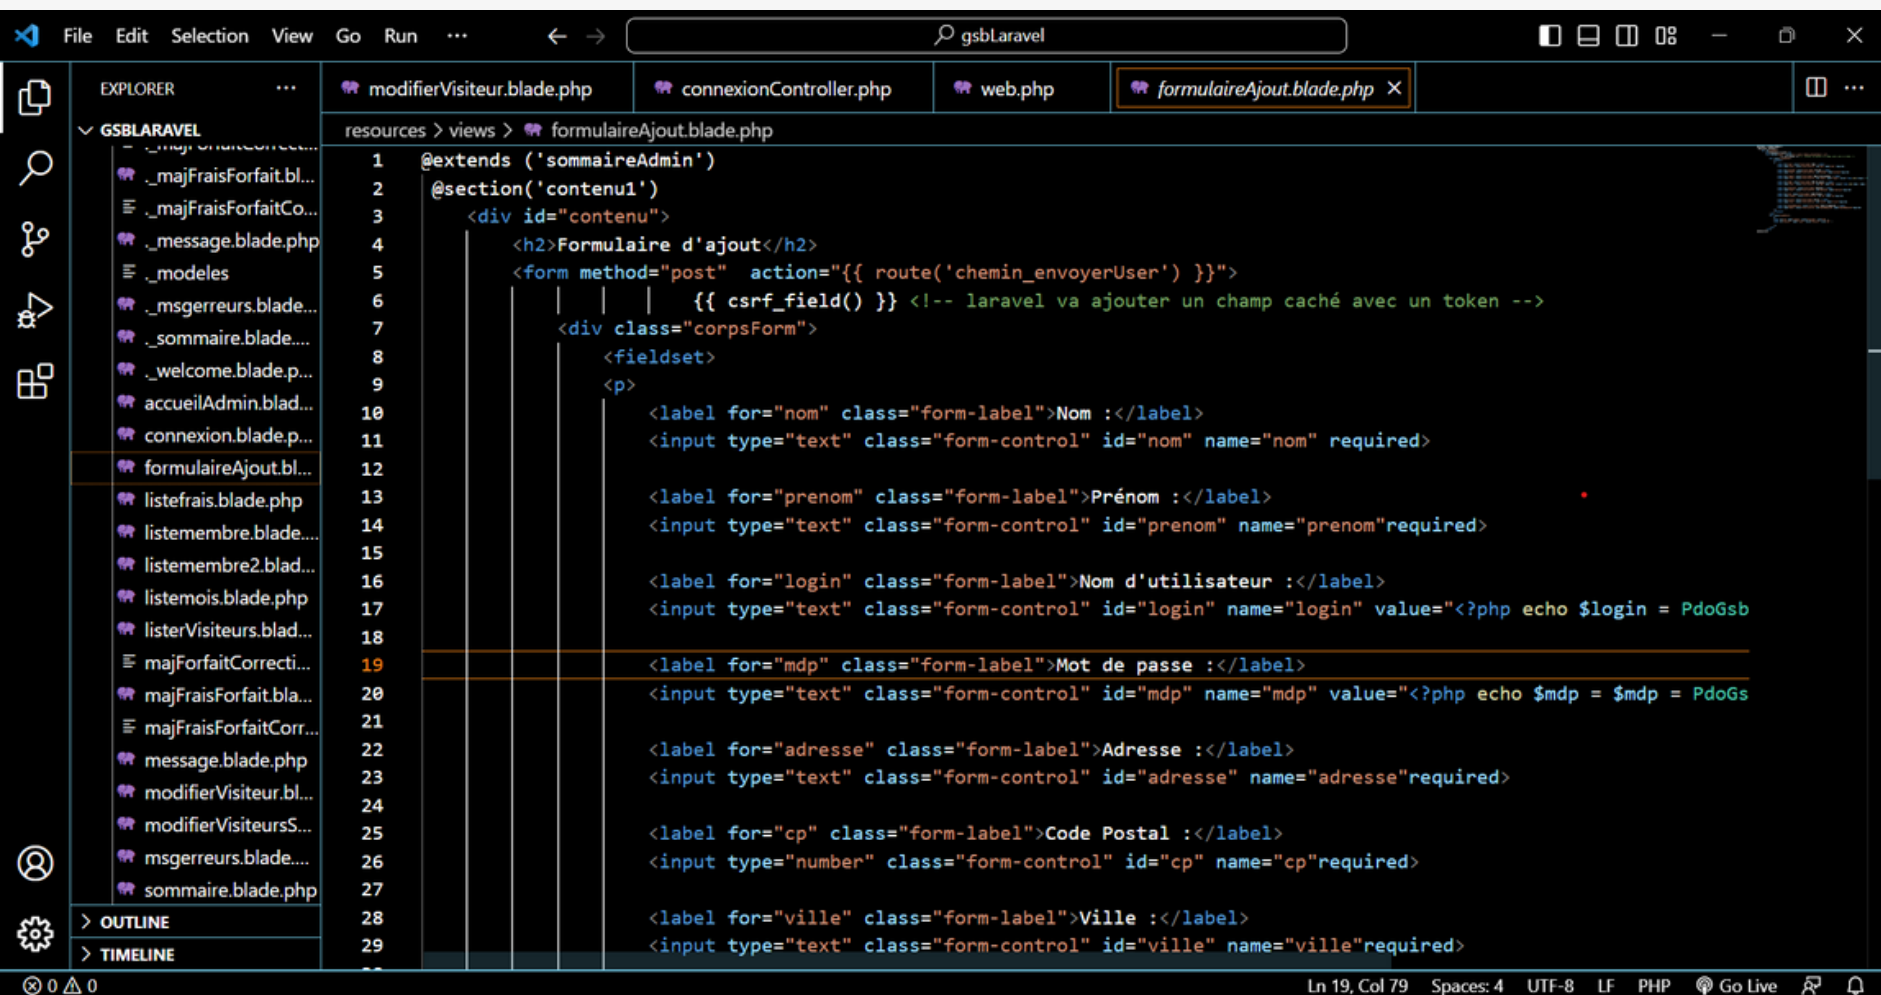

The screenshot shows a code editor with the following components:

- Explorer Panel:** Displays the project structure for 'GSBLARAVEL'. The 'routes' directory is expanded, showing files like '\_api.php', '\_channels.php', '\_console.php', '\_web.php', 'api.php', 'channels.php', 'console.php', and 'web.php'.
- Routes Panel:** Shows the 'routes > web.php' file. The code defines several routes with comments in French.
- Code Editor:** Contains the following route definitions:

```
14  
15  
16 | /*----- Use case état des frais-----*/  
17 Route::get('selectionMois',[  
18 |     'as'=>'chemin_selectionMois',  
19 |     'uses'=>'etatFraisController@selectionnerMois'  
20 |]);  
21  
22 Route::post('listeFrais',[  
23 |     'as'=>'chemin_listeFrais',  
24 |     'uses'=>'etatFraisController@voirFrais'  
25 |]);  
26  
27 | /*----- Use case gérer les frais-----*/  
28  
29 Route::get('gererFrais',[  
30 |     'as'=>'chemin_gestionFrais',  
31 |     'uses'=>'gererFraisController@saisirFrais'  
32 |]);  
33  
34 Route::post('sauvegarderFrais',[  
35 |     'as'=>'chemin_sauvegardeFrais',  
36 |     'uses'=>'gererFraisController@sauvegarderFrais'  
37 |]);  
38  
39 | /*----- Use case Ajouter un utilisateur-----*/  
40  
41 Route::get('ajouterUser',[  
42 |     'as'=>'chemin_ajouterUser',  
43 |     'uses'=>'gererUserController@ajouterUser'
```

The status bar at the bottom indicates 'Ln 14, Col 1, Spaces: 8, UTF-8, LF, PHP, @ Go Live'.

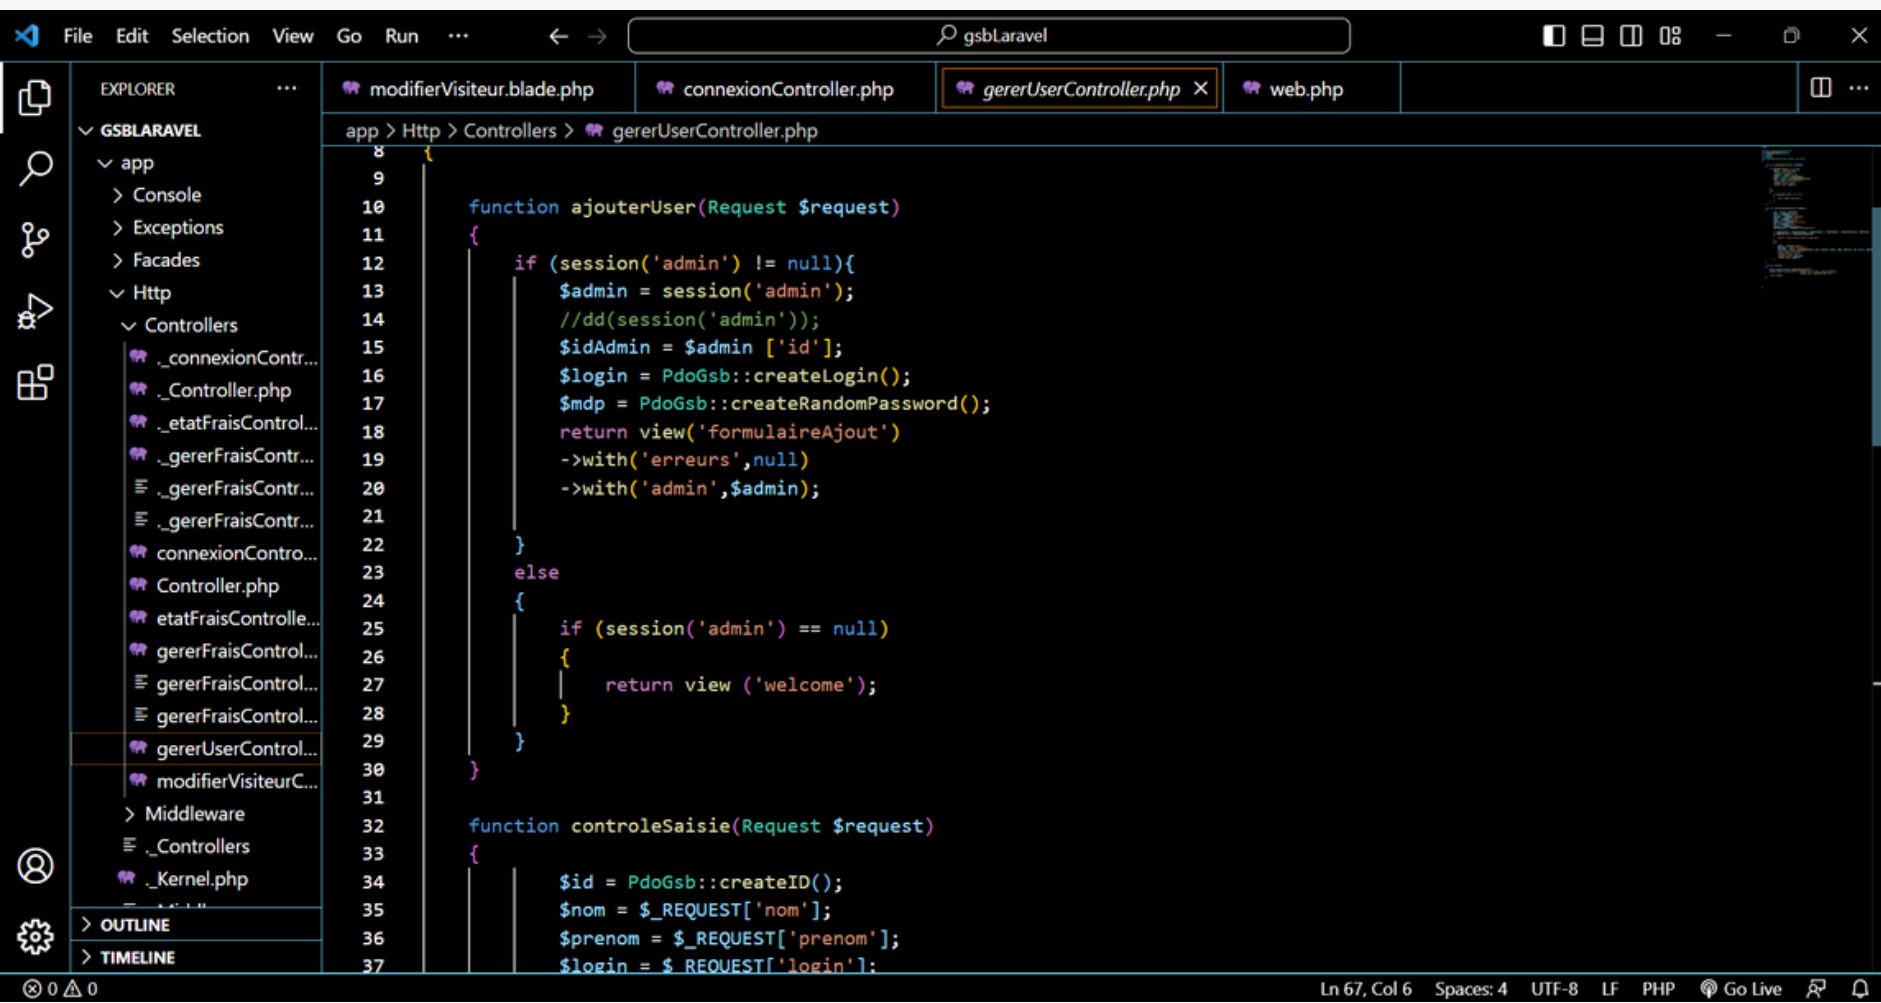

# Vue:

The screenshot shows a code editor with a dark theme. The Explorer panel on the left lists files in a project named 'GSBLARAVEL'. The main editor displays the file 'formulaireAjout.blade.php' from the 'resources > views' directory. The code is a Blade template for a user registration form, extending from 'sommaireAdmin'. It includes a form with fields for Nom, Prénom, Nom d'utilisateur, Mot de passe, Adresse, Code Postal, and Ville. The form uses Laravel's CSRF protection and includes PHP code for session management.

```
1 @extends ('sommaireAdmin')
2 @section('contenu1')
3     <div id="contenu">
4         <h2>Formulaire d'ajout</h2>
5         <form method="post" action="{{ route('chemin_envoyerUser') }}">
6             {{ csrf_field() }} <!-- laravel va ajouter un champ caché avec un token -->
7             <div class="corpsForm">
8                 <fieldset>
9                     <p>
10                         <label for="nom" class="form-label">Nom :</label>
11                         <input type="text" class="form-control" id="nom" name="nom" required>
12
13                         <label for="prenom" class="form-label">Prénom :</label>
14                         <input type="text" class="form-control" id="prenom" name="prenom" required>
15
16                         <label for="login" class="form-label">Nom d'utilisateur :</label>
17                         <input type="text" class="form-control" id="login" name="login" value="<?php echo $login = PDOGs
18
19                         <label for="mdp" class="form-label">Mot de passe :</label>
20                         <input type="text" class="form-control" id="mdp" name="mdp" value="<?php echo $mdp = $mdp = PDOGs
21
22                         <label for="adresse" class="form-label">Adresse :</label>
23                         <input type="text" class="form-control" id="adresse" name="adresse" required>
24
25                         <label for="cp" class="form-label">Code Postal :</label>
26                         <input type="number" class="form-control" id="cp" name="cp" required>
27
28                         <label for="ville" class="form-label">Ville :</label>
29                         <input type="text" class="form-control" id="ville" name="ville" required>
```

# Contrôleur:

The screenshot shows a code editor with a dark theme. The Explorer panel on the left shows the project structure for 'GSBLARAVEL', with the 'Http' > 'Controllers' directory expanded. The file 'gererUserController.php' is selected. The breadcrumb at the top of the editor reads 'app > Http > Controllers > gererUserController.php'. The editor displays the following PHP code:

```
8
9
10 function ajouterUser(Request $request)
11 {
12     if (session('admin') != null){
13         $admin = session('admin');
14         //dd(session('admin'));
15         $idAdmin = $admin ['id'];
16         $login = PdoGsb::createLogin();
17         $mdp = PdoGsb::createRandomPassword();
18         return view('formulaireAjout')
19             ->with('erreurs',null)
20             ->with('admin',$admin);
21     }
22     else
23     {
24         if (session('admin') == null)
25         {
26             return view ('welcome');
27         }
28     }
29 }
30
31
32 function controleSaisie(Request $request)
33 {
34     $id = PdoGsb::createID();
35     $nom = $_REQUEST['nom'];
36     $prenom = $_REQUEST['prenom'];
37     $login = $_REQUEST['login'];
```

The status bar at the bottom indicates 'Ln 67, Col 6', 'Spaces: 4', 'UTF-8', 'LF', 'PHP', and 'Go Live'.
